EXPERIENCE

Remote
Full Stack Web Development Student   4/2022 – 11/2021

Mastered intermediate and advanced topics in full-stack development (including Rails, Git, and DS&A challenges) while building multiple full-stack projects independently and via pair programming.

Budget App — Mobile web application where you can manage your budget: you have a list of transactions associated with a category so that you can see how much money you spend and on what. Built with: Ruby on Rails, PostgreSQL, Tailwind CSS

TV Show — Website displaying a list of movies from an external API. Built with: JavaScript, HTML5, CSS3

Countries Information—In this project, I have worked with real live data from the RESTCountries API. This web application provides some information about more than 250 countries worldwide like the area, population, capital, continent, and official flag. Built with: React, Redux, CSS3, Webpack

Software engineer intern at torre.ai   5/2023 – 12/2023

Gaining experience in identifying and resolving bugs, creating innovative features, and enhancing user experience. I implemented high-quality and impactful solutions using a variety of technologies including Scala with Play Framework, Python with Django, Kotlin, and Vue with Nuxt
